RoHS Declaration of Conformity

To whom it may concern,

The RoHS Directive 2011/65/EU (Restriction of Hazardous Substances) restricts the use of certain hazardous substances in electrical and electronic equipment placed on the European market.

The scope of the original RoHS was expanded to cover all electrical or electronic equipment, cables and spare parts with compliance required by July 22, 2019, or sooner.

Based on the best of our knowledge and the material content provided by our suppliers, none of the substances mentioned in the RoHS Directive are present in the materials that we use in our products more than the maximum concentration by weight allowed including also the exemptions 6A, 6B and 6C from Annex III of Directive 2011/65/EU. The exemptions allow copper alloy to contain up to 4% lead by weight.

NL Acoustics Ltd. confirms that all our products are RoHS compliant.

If you have any questions or require further information concerning NL Acoustics Ltd. implementation of RoHS, please don't hesitate to contact us.

Jonas Nyberg
